Introduction:

Problem Statement: As a dedicated college student, I want a way to be held accountable for my goals, so that I can become a more disciplined and successful person.

How Might We Statement: How might we provide a way for dedicated college students to be more disciplined and successful?

Testing Summary: Throughout the testing session, we learned a lot about the usability and efficacy of our goal-tracking app prototype. In general, people considered the interface to be intuitive and straightforward to use. They gave favorable comments for features like reminders and goal monitoring. Still, there were several noteworthy recommendations for enhancements, such as **boosting mobile optimization** and **introducing more interactive components** to elevate the user experience. Notably, users desired enhanced **social sharing capabilities**, suggesting that integrating with platforms like Facebook could increase engagement. These findings underscore the importance of ongoing usability testing to improve the app and ensure it meets user expectations iteratively. By prioritizing enhancements based on user feedback, we can deliver a more robust and user-centric goal-tracking app that fosters greater engagement and satisfaction.

Most interesting and relevant findings:

1. Boosting mobile optimization
2. Introducing more interactive components
3. Social sharing capabilities

Stoplight Chart:

	U1	U2	U3	U4	U5
Create an Account	5	5	5	5	5
Set a Goal	4	5	5	5	5
Goal Check In	3	2	2	1	3
Completion Rate	100%	100%	100%	100%	100%
Found App intuitive					
Share goals with others					
Navigation through tabs					
Easy-to-read texts					
User-Friendly Interface					
Attractive Design					

Pull Quotes:

1. "The ease of navigating through different pages and the simplicity of the design language of the platform stands out and creates a good experience for users."

- This quote suggests that the prototype has a user-friendly interface and intuitive navigation, indicating good usability.

2. "It would be great if we could share our goals on Facebook and stuff, not just with people in the app. That way, more friends could cheer us on."

- This feedback implies that while users find the app usable, they desire additional social sharing features to enhance engagement, which could improve usability by increasing user interaction and motivation.

3. "I find that the goal-tracking functionality and the periodic reminders that you mentioned can really be a motivating factor pushing the individual towards completing their tasks."

- This quote indicates that the goal-tracking features are effective and contribute positively to the user experience by providing motivation, suggesting good usability in terms of functionality.

4. “ I understand that this is a prototype and would recommend to include more interactive pages in the application that elevate the experience of the user.”

- This feedback suggests that while the prototype is functional, users desire more interactive elements to enhance their experience, indicating room for improvement in usability through increased engagement and interactivity.

5. "The app is really easy to use and looks nice. It's simple to find what you need without getting confused."

- This quote restates the app's usability, indicating that users find it easy to navigate and visually appealing, with clear organization and minimal confusion.

6. "I like how the app reminds me to stay on track with my goals. It's like having a helpful friend nudging me in the right direction."

- This feedback highlights the effectiveness of the app's reminder features, suggesting that they contribute positively to usability by aiding users in staying on track with their goals.

7. “I found the goal check in useful because I often lose focus or fail hold myself accountable long term”

- This feedback helps us identify certain features such as the push notifications or reminders that are appreciated and should remain prioritized as we continue to refine our product

8. “ I think that the mobile version could probably use some improvements”

- This feedback is helpful in identifying some issues with our product in terms of the omnichannel delivery experience. This feedback will lead us to refine our application to be of more use across devices.

9. "I didn't notice the get started button on the home page"

- This feedback highlighted some of the improvements that could be made regarding the aesthetic design of our site such as identifying significant processes or key actions with more emphasis.

10. "I didn't get the impression that the website was designed for tracking goals."

- This feedback helped us realize that certain parts of the website require improvements to give it the look and feel of a goal-tracking website.

Web App: We've implemented several changes to our high fidelity prototype aimed at improving user experience and functionality. Given that our platform is primarily web-based, we focused on adjustments that enhance readability and usability. One significant alteration involved modifying the colors of text on buttons to ensure better contrast with backgrounds to help improve readability. We also opted to remove social media icons to prevent possible user confusion. Additionally, we eliminated the option to open the email client when sharing Goalz to help streamline the user journey. Adjustments were made to backgrounds to mitigate text legibility issues, and images were replaced with more relevant ones to better align with our site's theme. Furthermore, we refined the naming of text boxes, aiming for clarity and ease of comprehension. A notable change was made to the layout of the goal check-in section, prioritizing intuitiveness. Lastly, we removed the "#" from our name, allowing it to now be easily used across social media platforms. These changes collectively aim to optimize the user experience and ensure a more seamless interaction with our website.

Implementation:

User Stories:

Epic 1 Description: Supporting continuous efforts

- User Story 1: As an overwhelmed college student, I want to make sure I don't lose focus on my long term goals so that I don't let my current situation to detrimentally impact my personal and professional development.
 - Focus on goal check in / reminders
- User Story 2: As a busy college student, I want to ensure my personal goals don't become after thoughts to my academic goals so that I can maintain a healthy work - life balance.
 - Focus on goal check in / progress
- User Story 3: As a college student, I won't have access to personalized coaching or mentorship services to receive guidance on goal setting and overcoming challenges.
 - Focus: Personalized coaching
- User Story 4: As a college student, I could receive motivational quotes or tips related to goal achievement along with reminders to keep me inspired and focused.
 - Focus: Motivational messages

Epic 2 Description: Enabling collaboration and peer accountability

- User Story 5: As a college student with group assignments, I want to make sure that my group is on the same page regarding deliverable progress and completion so that my team collaboratively operates effectively.
 - Focus on the goal sharing feature
- User Story 6: As a college student dealing with some burnout, I want to rejuvenate my energies by seeing peers and friends accomplish their goals so that I can feel more confident in my ability to do so as well.
 - Focus on goal sharing / community posts

Story Prioritization:

MoSCoW Prioritization:

Must Have:

- **User Story 1:** As an overwhelmed college student, I want to make sure I don't lose focus on my long term goals so that I don't let my current situation detrimentally impact my personal and professional development. (Focus on goal check-in/reminders)
- **User Story 2:** As a busy college student, I want to ensure my personal goals don't become afterthoughts to my academic goals so that I can maintain a healthy work-life balance. (Focus on goal check-in/progress)
- **User Story 3:** As a college student with group assignments, I want to make sure that my group is on the same page regarding deliverable progress and completion so that my team collaboratively operates effectively. (Focus on goal sharing feature)

Should Have:

- **User Story 4:** As a college student, I could receive motivational quotes or tips related to goal achievement along with reminders to keep me inspired and focused. (Focus: Motivational messages)

Could Have:

- **User Story 5:** As a college student dealing with some burnout, I want to rejuvenate my energies by seeing peers and friends accomplish their goals so that I can feel more confident in my ability to do so as well. (Focus on goal sharing/community posts)

Won't Have:

- **User Story 6:** As a college student, I won't have access to personalized coaching or mentorship services to receive guidance on goal setting and overcoming challenges. (Focus: Personalized coaching)

Conclusion:

Artifact Revisions:

Personas: While the core aspects of our User Persona remained unchanged, we took steps to improve its clarity and relevance. Our enhancement involved specifying the names of applications that our users are interested in and proficient with.

Journey Map: Since the last submission, no changes have been made to the journey map depicting the weekly academic journey. The newly created personas did not prompt any alterations to the journey map as their characteristics and needs aligned with the previously

identified user journey. Therefore, the map remains unchanged, illustrating the seamless flow of tasks and activities associated with academic life.

Lightning Demo: The initial lightning demo, while still relevant, was improved upon through additional competitors research and more applicable feature selections for our web application. The final lightning demo reflects an update from the original to reflect the more refined and definite stage of application development our group has progressed to.

Task Flows: To address the primary issue of excessive detail and the inclusion of irrelevant information in our task flows, we drastically simplified our flows. By refining our flows, we ensured that they remain focused on pertinent tasks while maintaining a consistent structure across all processes.

Team Reflection: Reflecting on our team's performance, we've had some notable high points and areas for improvement throughout the term. One of the most appreciated aspects was the absence of conflicts within the team, helping us to create a good working environment during collaborations. Our team also benefited greatly from the diverse skill sets each member brought to the project and the comfort with which team members shared ideas promoted creativity, especially during the app creation stages.

However, it's also important to acknowledge the challenges we faced. Communication emerged as a key area needing improvement, as breakdowns in communication hindered progress and led to misunderstandings. Time management was another aspect that presented difficulties, highlighting the need for better prioritization and resource allocation to meet deadlines effectively. Also, while collaboration was a central aspect of our project, it became evident that refining our collaborative processes and tools could enhance efficiency and productivity.
